DETAILED ACTION

Claims 1-46 have been examined. A restriction requirement is present.

Election/Restrictions

5. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-24 and 35-46 are drawn to an authentication system made up by a portable terminal and an authentication device, classified in class 713, subclass 193 (Electrical Computers and Digital Processing Systems: Data Processing Protection Using Cryptography: By Stored Data Protection).

10 II. Claims 25-34 are drawn to an encryption key inputting method, classified in class 380, subclass 277 (Cryptography: Key Management).

The inventions are distinct each from each other because:

15 Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if it can be shown that they are separately usable. In the instant case, invention II has separate utility from invention I such as being used as an encryption key method. See MPEP 806.05(d).

20 Because the inventions are distinct for the reasons given and have acquired a separate status in the art as seen by their separate classification, restriction for examination purposes is required. A complete response to this action must include an election of the invention to be examined, even if the requirement is traversed.

Conclusion

25 A shortened statutory period for response to this action is set to expire one month from the mail date of this letter. Failure to respond within the period for response will result in ABANDONMENT of the application (see 35 U.S.C. 133, M.P.E.P. 710.02, 710.02(b)).
